In February, OneeChanbara ORIGIN raised the most popular beta test event in the history of the franchise, and we decided to go one step further. This year, we're planning a poison-based event, entitled "Poisoning Experiment No. XX". In this event, you can play the Poisoning Game, which will cause poisoned squares on the field to appear. Points will be accumulated based on the amount of poison applied to the players. Poisoning Game Scoring The amount of points that you score will be based on the amount of poison squares applied to the players. If the players complete the mission before the poison squares are removed, they will obtain double or triple points. You can score up to 30 points for a

---

perfect run, 15 for a run that contains only Poison Points, and 1 or 3 points for a normal or Poison Point run. Each increment of 1 point applied to a player equals a full 2.5 minutes of game time on the clock. If all the players are poisoned, you will be able to enter a special stage where you can drain the poison from all the players, thus gaining triple points for a perfect run. However, if a player is poisoned and completes the mission, he or she will lose all points for that mission. Points are accumulated for a number of missions (up to 6). These missions will take place in random order throughout the event. However, the exact points gained from each mission will be determined by the Poisoning Game scoring system. Challenge Another

---

main feature of this mission is “Challenge”. Challenge is a mission that targets individuals in the same campaign. If there are 5 or more players that belong to the same one of the players in the Challenge, all of them will get scores based on the Poisoning Game scoring system and mission points. If there are more than 3 players that belong to the same Challenge target, you will be able to choose up to 6 players on your team, all of which will score points. You will be able to choose your team members manually or automatically. If more than one Challenge is active, you will be able to choose a team and access a page that allows you to view each Challenge. Best of all, Points will be accumulated for a number of missions. Note that all missions in this event

How to play: Controls: BOTOLO has an ultra-responsive joystick that gives you real-time control over your friend sims, teleportation and dash. To teleport, use the joystick to aim your sims in the direction of your destination, and click the mouse to launch them there. To dash, hold down the mouse button and move the mouse up or down to increase or decrease your dash speed. To teleport out, hold the mouse button and just move the mouse. Teleportation and dash are essentially mutually exclusive, so do not teleport your sims if they're carrying the ball. In other words, never teleport your sims in the direction of your opponent. Controls might seem like an afterthought, but they're

---

the lynchpin of your battles! BOTOLO also has a variety of camera controls, with a joystick, the mouse and a keyboard. To move the camera up, down, left or right, you must move the joystick in the corresponding direction. Moving the mouse forward or backward moves the camera in that direction. Pressing shift + left-click or shift + right-click moves the camera in a diagonal direction. Move the camera closer to your opponent by pressing shift + left-click and move it closer to the ball by pressing shift + right-click. To take a picture of your opponent, press the spacebar to enable camera auto-triggering. When the camera is focused on your opponent, press spacebar to auto-capture a picture of them. During a match, you may wish to zoom

---

in and out by pressing the plus and minus keys on the keyboard. When in a close-up mode, zoom in to have a better look at your opponent's thoughts. When playing against more than one opponent, press the "i" key to toggle between sims. Press the mouse button to teleport your sims to their destination and you may select a destination location on a grid to teleport them. Press the "r" key to rotate your sims 180 degrees and change their facing direction. Press the "s" key to switch your sims to the new sim mode and switch them off. Press the "t" key to launch your sims from the ball and teleport them. Press the "b" key to release your sims from ball mode. Press the "m" key to move your sims around in any direction and interact with the environment. Press "l" to lock

## **What's new in Epic Roller Coasters:**

**(1998) -Niko Bajarinajan(VS+1)how is it with you, cybe-virusr, cybe-virusr? Not going to lie, everyone loves those old James Cameron films! The Spirits Within is a rich flick, mixed up with sarcasm, and the roar of the vampire movie especially loved by audiences in those days. It's still a fun blast of entertainment, born out of the 80's horror-inspired slasher genre. As time passes on, the genre has changed. At first, I had two reasons for this, 1. the poor acting of the stars, and 2. failure of the dreams of the filmmakers of the original. Now, I believe the best filmmakers of this monster gore, serial killer/slasher/vampire film is the direct result of what Cameron said in the P.S. Left On The Terminator (2006). Cameron said this, on screen in an executive quote, " Film is dead, we now have storytelling on TV." This shows the shift in emphasis, and why the best vampire films are the ones that are the result of the best filmmakers. Blood Sisters is an example of this. I love the mix of horror vampires, serial killers, and witchcraft, and as a result, the best of the best, from the good, the great, and the ultra. For the sake of this article, this universe of vampire movies will cover not only feature, but more accurately, the large juvenile monsters-that-eat-dead-people. Both the sides. To address the vampire side of this movie, I started at the beginning. I've discussed this movie at length before, recently, and one thing that is true in our universe is that we'll never stop talking about Nite-Flyte. Nite-Flyte was written by Carlton Moses. Nite-Flyte is written on Cybertech, an intelligent non-speaking cyborg. He lives in the ruins of ancient Babylon, from a time long past. Nite-Flyte was released 15 July 2013, in the UK**

**and has been slated by critics, and by several audiences. Nite-Flyte is a film about alien creatures who inhabit a necropolis (Egypt) and possess telepathic powers. It centers on Vardoulis, a woman who was either possessed by the beings, or abducted and raped, it's never known. Both characters follow each other through**
