Import and export drawings in DWG format from more than 50 CAD software packages to AutoCAD, CmapD and CmapDx. (video: 1:15 min.) Get the most out of your CAD drawings with Dynamic Graphics Engine (DGX) for AutoCAD. DGX makes it possible to work in AutoCAD for hours on end, rendering graphics in the background without CPU or memory impact. (video: 6:00 min.) Create shared layers and hierarchies for different projects from within a single drawing. Rename layers with the same name across different drawings. Automatically update the linked drawings without interfering with the layer structure. (video: 3:00 min.) Save and save history as HTML or images. View and edit files and work with large numbers of files simultaneously. (video: 2:00 min.) Save AutoCAD drawings as HTML. Any type of data can be stored in files you can create yourself. (video: 1:45 min.) Miscellaneous: Create color-coded PDFs by automatically displaying color-coded drawings. See whether a legend or text annotation is superimposed over your drawings. (video: 4:35 min.) 3D AutoCAD: Integrate 3D drawings into the drawing environment with 3D Co-Located Data. Connect 3D drawings created with the AutoCAD CAD Masterpiece subprogram. Make one AutoCAD drawing share the color and geometry of another drawing. With a single command you can import an external block into a linked drawing. Interconnect 2D and 3D drawings without complicated setup. Interconnect a 2D drawing to a 3D AutoCAD drawing with Link Edges. Use an AutoCAD drawing as the foundation for a 3D model. Link a 2D drawing to a 3D model. Use 3D dialog boxes to set parameters and view the 3D model from inside your 2D drawing. Interactively import a 3D model into AutoCAD, and add the model to a 2D drawing with Create Linked Model. 2D and 3D drawings that are linked in this way appear in both drawings as single objects. Links also work when importing drawings into AutoCAD. Show a single glyph in 3D on all drawings. Show the glyph in all views, not just the current view.
